

JMS Plastics Introduces J-Foam Air High Rebound EVA

JMS Plastics Supply, Inc., has introduced yet another high quality and cost effective top covering material. J-Foam Air High Rebound EVA is the perfect top cover for orthotics. It can also be used as a middle layer for many foot orthoses. This innovative product is heat moldable and more cost effective than other competitive materials.

J-Foam Air High Rebound EVA rebounds to 95% of its original thickness with a high degree of shock absorbency and a closed cell structure. Clients love its durability and washability. It also repels moisture, which is vitally important to eliminating bacterial growth.

J-Foam Air High Rebound EVA is available in four thicknesses and colors.

Call JMS Plastics at 1-800-342-2602 for your free samples to test this innovative new material today! Sheets of all colors and thicknesses are in stock and available for immediate delivery. Further details can be obtained at www.jmsplastics.com.

99% of doctors agree that Omega-3 is essential for their patients

In a recent survey of randomly selected doctors, 99% responded that they believe the consumption of fish oil supplements has been shown to reduce mortality in patients with cardiovascular disease (CVD).

There is an overriding factor and that is confusion regarding what source of Omega 3 is the right choice. The doctor can and should play an important roll in the decision making process.

That's why 3 Care Therapeutics, partnering with Napro Pharma of Norway, has made that choice simple for doctors by developing a new line of Omega 3 fish oils and nutraceutical formulas. All 3 Care Omega-3 formulas are third-party tested to insure purity and free of heavy metals, toxins, pesticides, molds and microorganisms.

3 Care products are pharmaceutical grade, great tasting and at the best price available in the professional

market. For a brochure and a free one-month supply call 1-888-EPADHA1 (1-888-372-3421) or visit omega3care.com.

How do you figure out which software is right for your practice?

Good question. In celebration of its 20th anniversary, EON Systems, makers of The Practice

Solution™ and Documentor™, is doing free, public service webinars to help you answer that question. "How to Evaluate Software for Your Practice" provides practical common sense answers to a worrisome problem for most practitioners.

The free webinar instructs participants in how to choose software the right way, how NOT to choose software, five very costly mistakes in choosing software and ten things a practitioner should know about software for his or her practice.

"We feel an educated buyer makes the best client," says Derek Greenwood, the CEO of EON Systems.

The webinar is about 45 minutes long and takes place on various days and times to accommodate busy schedules. Visit www.eonsystems.net for information on the schedule and how to register.

New, Non-IV Professional Strength, EDTA Heavy Metal Detox

Kelatox announces the introduction of a professional strength 1200 mg EDTA suppository product, designed specifically for health care professionals wanting to treat patients to rid heavy metals, without the need for IV chelation.

Kelatox® is a rectal, time-released suppository that binds and removes harmful heavy metals from your body. Kelatox® uses Calcium Disodium EDTA in a Cocoa Butter base with methocel E4M premium USP for a time-release effect. Each suppository will dissolve through body heat and gradually spread over the lining of the colon and be absorbed directly into the blood stream in approximately 90-120 minutes.

The Center for Disease Control (CDC) has recommended EDTA chelation therapy for lead poisoning and other toxic heavy metal conditions for decades, and EDTA chelation is widely accepted as the best form of treatment for such conditions.

For more information on Hormonal Health, LLC, call 1-877-723-4239, 1-949-705-6684 or visit www.kelatopro.com.
